

World Food Day

Did you know?

- Nearly one third of the world's population (about 2.7 billion people) can't afford healthy food.
- Conflict is one of the main reasons that people can't access enough food. Around 70% of food-insecure people live in countries affected by conflict.
- Climate change causes more unpredictable and intense weather which makes it harder for farmers to grow enough food to support their families.

This World Food Day, please join us in prayer and by taking action for a more sustainable future. Together we can make sure everyone around the world has enough to eat.

Visit clwr.org/wfd to learn more.
